

RJE Global (RJE) is an Australian-owned engineering and construction company with a reputation for delivering innovative, client focused solutions that get the job done. At RJE, we provide multi-discipline engineering and construction services to complex projects across a diverse range of industries including: Mining and Power, Power and Utilities, Transport, Infrastructure and Defence. With over 350 employees, we provide everything from initial ideas to full operations both within Australia and Internationally.

Our in house service capabilities specific to the Defence Industry include Engineering, Manufacturing and Construction of:

- Modular / Deployable / Demountable / In-Situ / Transportable Facilities
- Sensitive Compartmented Information Facilities (SCIFs)
- Zone 4 / Zone 5 areas incl. Radio Frequency Shielding
- Blast / Ballistic / Attack / Fire / Cyclone Rated Facilities
- Armouries / Vaults
- Correctional Facilities / Detention centres / Cell Blocks
- Data Centres
- Communication/Switch Rooms
- RF Shielded observatories and operation buildings

Our strong set of values underpins everything we do and have been the cornerstone of our success to date. RJE are proud of our reputation for building collaborative partnerships with our clients through open communication, transparency as well as our responsiveness and agility to meet the needs of each project. This has enabled us to gain our clients trust and confidence and to deliver truly outstanding results. No problem is too large, small or difficult for our team. We constantly strive to solve our clients challenges to deliver smarter engineering solutions in a pragmatic and uncomplicated manner.
